Continuation Sheet (PTOL-413)

pplication No. 09/804,987

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

The issues related to scope enablement for (i) arteries, (ii) agents that downregualte an EDG receptor signlaing, and (iii) EDG receptors, were discussed. The Examiner maintained that the specification does not enable a method of increasing vasodilation or inhibition of vasoconstriction in any arteries comprising any agents that downregulate any EDG receptor signaling.

The issue related to written description regarding "a neuroprotective agent' was also discussed. Applicants would consider submitting an amendment either to narrow the scope of the invention or to substantiate their arguments .
